

Battery has no power Why

Overview

The most obvious issue is a dead car battery that's discharged enough to create no power. It could also be due to a blown main fuse, a loose battery cable, a bad ignition switch, a failing alternator, or a bad starter. Only a complete diagnostic evaluation will reveal the. If your car has no power at all, you may be dealing with a larger issue than you imagined at first. Sure, it could still be a dead car battery, but there are multiple other possibilities you may. If you want to get back on the road, you need to fix the electrical power problem you're having. We've outlined a few steps that we would take as.
