

What are the names of solar panels

Overview

There are nine main types of solar panels: monocrystalline, polycrystalline, thin film, transparent, Concentrator Photovoltaics (CPV), Passivated Emitter and Rear Contact (PERC), perovskite, solar tile, and solar thermal. Each of these panels comes with its own advantages and disadvantages, and will suit some homes better. When you're trying to pick the best solar panels for you, you'll need to consider a few factors. If aesthetics is most important to you, you should look into sleek monocrystalline solar. The solar panel industry is always developing and changing for the better, as the older models are supplanted by new, more efficient versions. Here's what you can expect in the next few years. When it comes to domestic solar panels, homeowners can choose between polycrystalline, monocrystalline, and thin film - the right type for you will depend entirely on your priorities.
